

Changing medicine, changing lives

Kyowa Kirin-North America is a specialty pharmaceutical company focused on creating innovative medicines with the latest biotechnology. For more than 30 years, we have pursued scientific discoveries that address unmet clinical needs. We work in an unbroken chain—from research and discovery, through development and commercialization—in order to surmount the challenges of innovating in new frontiers.

Our commitment to advancing breakthroughs has produced a portfolio of specialty medicines with novel mechanisms of action. Since 2018, the company has received approval from the U.S. Food and Drug Administration (FDA) for three first-in-class treatments. These medicines add to Kyowa Kirin's rich history of innovation, delivering treatments for Oncology, Immunology/Allergy, Nephrology and the Central Nervous System.

Grounded by our expertise in antibody engineering, we continue to investigate new molecules with the potential to change medicine and lives.
