

**Daily Staff Huddle Reminder:**  
**Value of Chlorhexidine and Iodophor for Residents**

- Tell residents:
  - This bath and nasal product will protect them from infection during their nursing home stay
  - Chlorhexidine is more protective than soap and water
  - Nasal iodophor removes “staph” – a common bacteria that lives in the nose and causes a wide range of serious infections

  - Chlorhexidine is more protective than soap and water
  - Nasal iodophor removes “staph” – a common bacteria that lives in the nose and causes a wide range of serious infections

**Daily Staff Huddle Reminder:**  
**Importance of Bathing on Admission**

- Admission bathing is one of the most important times to bathe to get rid of germs being brought into the nursing home
- Residents may not feel well when they arrive and may not have bathed in days. They can bring in germs, including multi-drug resistant organisms
- Bathing residents on admission not only protects them but also protects the nursing home, keeping all residents clean

- Bathing residents on admission not only protects them but also protects the nursing home, keeping all residents clean

### Daily Staff Huddle Reminder: Cleaning Wounds and Devices

- Do not forget wounds and devices! Cleaning them prevents surface bacteria from diving into the body and causing infection.
- Clean **ALL devices** - lines, tubes, drains - within 6 inches of the body.
- Clean **ALL wounds** unless deep or packed.
- Residents likely will be uncomfortable cleaning wounds & devices. Staff should **HELP** clean them.
- Staff: use additional cloths or disposable wipes with 2% CHG to clean resident's wounds and devices after showering.

- Staff: use additional cloths or disposable wipes with 2% CHG to clean resident's wounds and devices after showering.

### Daily Staff Huddle Reminder: Incontinence Clean Up

- **DO NOT** use CHG cloths or disposable wipes with 2% CHG to clean up incontinence. Use only to apply to skin after soilage removed.
- Clean soiled area with other wipes/cloth and water first, then use **SINGLE** CHG packet or disposable wipes with 2% CHG liquid for reapplication.
- An additional full bath (head to toe) is not needed after incontinence clean up
  - CHG works for at least 24 hours to protect resident
  - Residual CHG from last bath or shower will still protect resident

  - CHG works for at least 24 hours to protect resident
  - Residual CHG from last bath or shower will still protect resident

**Daily Staff Huddle Reminder:**  
**Iodophor Administration**

- Iodophor helps get rid of “staph” and MRSA which are known to cause infection.
- Iodophor should be applied twice daily for 5 days to all adult residents according to the nursing home’s every other week schedule.
- Like CHG bathing, goal is to start iodophor on admission since residents may be bringing in germs into the nursing home.
