

UCI Health – Orange | Comprehensive Stroke & Cerebrovascular Center

Publicly Reported Outcomes – 2025

When Every Minute Matters, Experience Matters

Certified
Comprehensive
Stroke Center

High Performing in:

- Neurology
- Neurosurgery
- Stroke

Excellence in:

- Stroke Care
- Neurosciences
- Cranial Neurosurgery

National Recognition for Stroke Excellence

Among numerous accolades, UCI Health – Orange was recognized by U.S. News & World Report as a **High Performing Stroke Center** for excellence in survival rates, recovery at home, and stroke treatment volume.

Survival
After a Stroke
Excellent

Survival 30 days after hospitalization for stroke, compared to other hospitals treating similar patients.

Patients Discharged
Home
Excellent

How often patients go directly home from this hospital rather than being discharged to another facility, an indication that the patient was well enough to begin recovery at home.

Nurse Staffing and
Communication
Excellent

More nursing care per patient and effective nurse communication are associated with improved patient outcomes, safety, and satisfaction.

Number of
Patients
Very High

Number of inpatients age 65 or over who had stroke. More experience is associated with better outcomes.

Advanced Stroke Expertise Drives Exceptional Outcomes

Our **fellowship-trained, board-certified** stroke neurologists provide **24/7, year-round** hospital coverage and access to multiple clinical trials — ensuring timely diagnosis, advanced treatment, and improved patient outcomes.

Door to Brain Scan
Results

21
minutes

Goal ≤ 25 min. Rapid brain imaging allows our team to quickly confirm a stroke diagnosis and begin treatment without delay.

Door to Clot-Busting
Medication

29
minutes

Goal ≤ 30 min. Early treatment with clot-dissolving medication helps preserve brain tissue and improve the chance of recovery.

Clot Removal
Procedure

91%

Successful Restoration of Flow

Restoring blood flow to the brain is strongly associated with improved recovery and functional outcomes.

Carotid
Procedures

0%

Stroke & Mortality Rate

These results reflect exceptional safety in carotid and cerebrovascular procedures performed by our experienced multidisciplinary team.

Stroke Care Beyond the Hospital

- Coordinated discharge planning
- Individualized stroke risk factor management
- Dedicated outpatient stroke follow-up
- Virtual Stroke Support Group
- Virtual Stroke Prevention Education Class

We recognize that recovery does not end at discharge. For many patients and families, the transition home can be the most challenging part of stroke recovery. We ensure every patient has **coordinated follow-up with our cerebrovascular specialists** to support long-term recovery and prevention.

Call for program details, support resources, and stroke prevention information.

Dedicated Stroke Line: 1-866-STROKE-3

Call 911 if you or another person is experiencing a stroke.

Serving Orange County as the region's only academic stroke center.
